OBJECTIVE

AI-driven Cybersecurity Consultant with 3 years of experience in External Attack Surface Management (EASM), Application Security Testing, and Security Operations. Skilled in identifying vulnerabilities in internet-facing assets, managing external website inventories, and coordinating remediation with development and security teams. Passionate about improving security operations through automation, AI-assisted workflows, and proactive vulnerability discovery

PROFESSIONAL SUMMARY

- Cybersecurity professional with experience in Security Operations, Application Security, and External Attack Surface Management (EASM). Currently working as a Security Consultant at Sony India Software Centre, responsible for managing externally exposed web assets, performing Dynamic Application Security Testing (DAST), and maintaining visibility of internet-facing organizational infrastructure.
- Experienced in website inventory management, SSL certificate lifecycle monitoring, and continuous discovery of new project-related websites across the internet. Skilled in identifying vulnerabilities in web applications and coordinating remediation with application teams.
- Previously worked in SOC operations, handling threat monitoring, phishing investigations, malware detection, and major incident management using Splunk SIEM and SentinelOne EDR. Familiar with security frameworks including MITRE ATT&CK, NIST, and Cyber Kill Chain.
- Experienced in leveraging AI tools to assist with repetitive security tasks, reporting workflows, and operational efficiency improvements.

CORE SKILLS

- Application Security, EASM, DAST, Vulnerability Management
- WordPress Security, Threat Detection, Incident Response
- SSL Certificate Management, Asset Discovery, Security Automation

EXPERIENCE

Security Consultant at Sony India Software Centre, Bengaluru

May 2025 – Present

- Manage Microsoft Defender External Attack Surface Management (MDEASM) to track internet-facing organizational assets and maintain the inventory.
- Perform Dynamic Application Security Testing (DAST) using Invicti to identify vulnerabilities in web applications and coordinate remediation with the application teams.
- Maintain inventory of project-related websites and conduct continuous discovery of external assets.
- Monitor SSL certificate lifecycle and coordinate renewals with security teams.

- Perform WordPress Scans to identify vuln's and coordinate remediation with application teams.
- Support Website Management Office (WMO) processes including website onboarding and governance before go live of the application.
- Use AI tools to automate repetitive reporting and operational tasks.

Security Analyst & Incident Manager at Dolf Technologies, Hyderabad.

May 2023 – May 2025

- Monitored security alerts using Splunk SIEM to detect suspicious activity.
- Investigated phishing, malware, and security incidents using SentinelOne EDR.
- Managed major incident response and coordinated with cross-functional teams.
- Performed threat analysis using MITRE ATT&CK, NIST, and Cyber Kill Chain.

Security Analyst Intern at Tracelay Networks, Bengaluru (Remote).

Nov 2022 – Jan 2023

- Assisted in monitoring and investigating security alerts and phishing incidents.
- Gained hands-on experience in security monitoring, incident response, and threat analysis.

TOOLS AND TECHNOLOGIES

- **Attack Surface Management:** Microsoft Defender EASM
- **Security Information Event Management:** Splunk
- **Endpoint Detection & Response:** SentinelOne, TrendMicro
- **Threat Intelligence:** VirusTotal, AbuseIPDB
- **Ticketing / Workflow:** Jira, ServiceNow
- **Operating Systems:** Ubuntu, Windows
- **Security Frameworks:** MITRE ATT&CK, NIST, Cyber Kill Chain

EDUCATION

Bachelor of Science in Computer Science, Sri Krishnadevaraya University, 2023.

PROJECTS

DNS Log Analysis with Splunk: Analyzed DNS logs to detect malicious domains and suspicious network activity.

Malware Analysis with SentinelOne: Studied ransomware variants such as WannaCry, Ryuk, and REvil to understand attack behavior.

I here declare that the above given information is correct to the best of my knowledge and belief.
